

ABC Press Release Indicates Mandatory 1000 Internship Hours To Become Certified in Pedorthics - Effective March 2, 2009

The Robert M. Palmer, M.D., Institute Of Biomechanics, A Not-For-Profit School had developed three **Financial Aid Scholarship Programs** to assist those who may be presented with difficulty in participating in a pre-certification course prior to the ABC deadline date of March 1, 2009. (visit the RMPi website to view official ABC Press Release at www.rmpi.org or by contacting www.cped.org) This Scholarship Tuition Price has been extended until December 2009 as many individuals were unaware of the new requirements of the ABC and were unable to adequately prepare their business or themselves with this new requirement.

While the RMPi supports the increased, mandatory 1000 internship hours, the short notice for this deadline may present some individuals or companies with financial distress in their attempt to properly staff their business or meet the diabetic epidemic needs within the USA. Therefore, the RMPi would like to offer the following Scholarships:

- 1) "Do It Now! Become A C.Ped. Scholarship!" Course Tuition \$2000.00 - Levels 1,2,3; full payment at time of enrollment; free modest housing with limited availability.
- 2) Short Term Financial Plan Scholarship - Course Tuition \$2500.00 - 3 months financing; final payment and course completion due within three months of enrollment; free modest housing with limited availability.
- 3) Long Term Financial Plan Scholarship - Course Tuition \$3000.00, course completion due by February 25, 2009; 12 months financing with initial payment of \$500.00 then automatic withdrawals from debit, visa or mastercard for eleven months. The Certificate of completion will be dispensed once full payment has been received.
